

Dimmer Switch Kit Wiring Diagram

Part No. FR20118-8

Dimmer Switch, Aluminum Arm
(102766)

Dimmer Switch Relay
(FR20118-3R)

The Dimmer Switch Kit (FR20118-8) from Flaming River Industries will allow you to change between your low and high beam headlight right from the turn signal arm! This sheet will inform you of the necessary connections in order to wire the dimmer kit properly.

Headlight Dimmer Control

Aluminum Arm with Dimmer Switch
(102766)

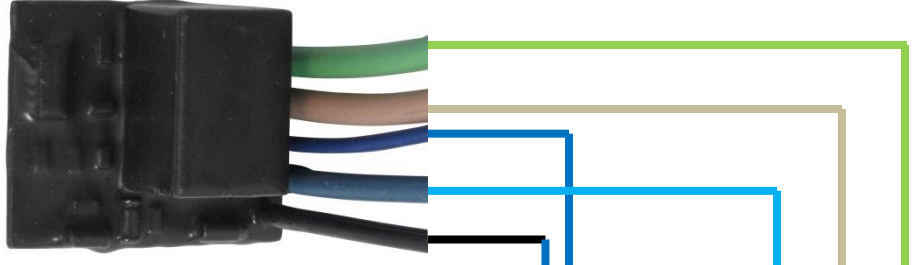

Momentary pushbutton switch toggles between High/Low Beam headlights.

The dimmer switch has two identical Blue wires. One is connected to the Blue switch control wire on the relay circuit, and the other is connected to the Black ground wire.

Dimmer Switch Kit Relay
